WHO WE ARE
Future Coalition is a network and community for youth-led organizations and youth leaders across the country. Future Coalition works collaboratively to provide young people with the resources, tools, and support they need to create the change they want to see in their communities and in this country.

PURPOSE
The Future Accelerator is a project of the Future Coalition that matches youth-led organizations, youth activists, and young people running for office with adult allies willing to lend their skills and expertise with the youth movement. These skills can span from data support, to graphic design, to interview prep. We connect experts in these areas with you to build your capacity and grow your impact.

HOW IT WORKS
Future Accelerator is a “matchmaking” program - young people in need of specific pro-bono campaign or support services are matched by Future Coalition staff with adult allies willing to contribute their relevant time, skills, and expertise to lift up the next generation of activists.

We are developing a database of youth activists and adult volunteers with defined time and project commitments, through which we will connect together based on skills needed and volunteered.

Future Accelerator is specifically project based. This means that those we connect you with are committed to one task at a time, not for an ongoing need or role.
